FOR IMMEDIATE RELEASE

**MALEKKO UNLEASHES THREE NEW MODULES TO UNITE YOUR STUDIO
*SYNC + CV/GATE + DIN SYNC***

Portland, OR - JANUARY 9th, 2017 - On the heels of the Varigate 8+ and more recently the Voltage Block come 3 new modules to unite your Eurorack modular system to your computer using MIDI clock directly over USB, note messages from your DAW as well as din sync for the use of classic gear like the Roland 808.

SYNC is the mothership module, connecting directly to your computer via class compliant USB for MIDI clock transmission. It receives and transmits clock and also includes clock division as well as MIDI over 3.5 cables (included). CV/GATE connects to SYNC via a 6-pin cable. Via CV/GATE (SYNC and your DAW), MIDI messages are then delivered in three available modes: MONO, POLY and TRIGGER. Sending notes from your computer to your modular is seamless. DIN SYNC also connects to SYNC via a 6-pin cable for clocking your favorite classic din sync gear to your modular system and your DAW.

All 3 module features include:

- USB connection
- Reset output
- Fixed 1/16 note clock output
- Variable clock output
- MIDI in (over 3.5mm)
- MIDI out/thru (over 3.5mm)
- 4 sets of CV/Gate connections
- 3 way mode switch
- Modes : Mono (MIDI channels 1-4 sent separately out cv/gate jacks 1-4), Poly (4 notes sent over channel 1 to the 4 cv/gate jacks), Drum Trigger (notes C1-G1 send gates out of the 8 jacks).
- 4 DIN SYNC outputs each with their own selectable clock divisions (1,2,4)
